

3-HIGH MONOCOQUE. Terminal designed for use with trucks, cars and on foot. Allows contactless access control without waiting.

The monocoque structure has a double sealed base and forced ventilation. It can be manufactured in AISI 304 stainless steel, 316 for marine environments or 316L for corrosive environments. Designed under the IP65 standard to incorporate peripherals that support this degree of protection.

Its structure can house a large screen or two 22" panel screens, making it ergonomic. It can also incorporate a webcam, ticket printer, card reader or DNle, adapting to the needs of each project. It is available in any colour from the RAL range and can be adapted to the client's brand image by means of cut vinyl or digital image.
